DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 37-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 37, lines 3-4: what is “a uniform thickness on the board” referring to?

Claim 38, lines 1-2: is “a second of said plurality of wiring lines” part of the plurality of wiring lines? If it is not, then the “a second of said plurality of wiring lines” should be amended to –a second of plurality of wiring lines--.

Claim 38, line 2: is “said first wiring line” referring to a first of said plurality of wiring lines or something else?

Claim 38, lines 2-3: is “the second wiring line” referring to many or just one line? Is “the second wiring line” part of the second of said plurality of wiring lines or not?

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 37-38, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Takahashi et al (US 4,413,309).

Takahashi discloses a plurality of wiring lines with a uniform thickness formed on the board (Fig. 2), first and second portions of the first of the plurality of wiring lines have different heights (hold the Takahashi patent 90 degrees and 2 and 7 along II-II have different heights in Fig. 1), and third and fourth portions of the second of the plurality of wiring lines have different heights (hold the Takahashi patent 90 degrees and 2 and 7 (with IV-IV marking) have different heights in Fig. 1). Chemical etching is performed in different portions thereof, as shown in Fig. 1.

Response to Arguments

5. Applicant's arguments filed 12/26/02 have been fully considered but they are not persuasive.

Applicant's concerns are addressed above.

Interviews After Final

6. **Applicant note that an interview after a final rejection will not be granted unless the intended purpose and content of the interview is presented briefly, in writing (the agenda of the interview must be in writing) to clarify issues for appeal requiring only nominal further consideration. Interviews merely to restate arguments of record or to discuss new limitations will be denied. See MPEP 714.13 and 713.09.**

Conclusion

7. **Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.**

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rick K. Chang whose telephone number is (703) 308-4784.
